**EDITORIAL**

After working hard by the editorial members, the issue of Vol. 20 of BNM is finally published. The editorial would like to apologize to all contributors and readers for patiently waiting and loyally supporting of the BNM new issue. This effort has to be appreciated and we hope this spirit will continue for the live of MNS and BNM in particular.

We know that the issue of BNM needs very strong support and commitment from all members of MNS and readers in general. The editorial is very optimistic, with the good support and enough articles from the contributors the half yearly issue of this bulletin will be published on schedule. We also see that from the past few years there was encouraging response from contributors of other organizations beside Nuclear Malaysia. This can probably be improved in the future as sharing and disseminating knowledge is one of the agendas of our society. Different authors could deliver the same message but probably from a different approach. The editorial would also like to welcome contribution from student at levels of education and the MNS has agreed to provide some token as an incentive for your efforts.

The editor welcome articles and news from any related science, technology, engineering regulatory and economy issues. However, we should be bear in mind that the nuclear and nuclear related articles and news should reflex the title of this bulletin. With the current scenario and trend of world energy demand, food and water security, environmental concerned, it is hope that articles and news related to nuclear and nuclear related issue, in particular could be a "hot" topic of discussion.
